DETAILED ACTION

1. Cancellation of claims 1-19 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 20-22, 25, 26 and 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Cameron et al (1,567,706), hereafter Cameron. Cameron discloses feed path of recording medium 3 in figure 1, which is the path that the medium 3 travels; curved portion occurs when the medium is bent around element 1; transfer direction is the direction that medium 3 is traveling in figure 1; middle is at 1; first feed rollers 4, 5; end cutter 6, 7; side cutter; upstream side is to the right of cutter 6, 7 in figure 1; feed path length is shorter than shorter than length of the recording medium in the transfer direction as seen in figures 4 and 5; the transfer direction is defined by the length that the recording medium travels, and in the figures 4 and 5 the transfer direction length is from the right side on the figure to the left side of the figure; cutter 6, 7 cuts a leading edge, cutter 2 partially cuts the medium and completely cuts the medium, and the cutter 6 and 7 cuts the trailing edge; curved portion has about 90 degrees; containing section 10; containing section 10 inherently has an antistatic property as shown in figure 3 because the

medium 8 are not wrinkled or bunched-up due to static friction, but instead in linear relationship to one another.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 23, 24, 27 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cameron in view of Pfister (1,340,137). Cameron discloses everything as noted above and discloses axes inside element 1 and 2, and end cutter moving mechanism 6, but does not disclose two pairs of rotary blades, a second pair of feed rollers and does not disclose a moving mechanism. However, Pfister teaches two pairs of rotary blades 35, 36; second pair of feed rollers 20, 21, 24, 25; moving mechanism 30, 29, 27. It would have been obvious to provide two pairs of rotary blades, a second pair of feed rollers and a moving mechanism in Cameron in view of Pfister in order to produce a clean cut on the case that the material thickness is doubled or tripled. See column 3, lines 1-10. Note fixed blade 35 and movable blade 36 in Pfister.

Response to Arguments

Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac Hamilton whose telephone number is 703-305-4949. The examiner can normally be reached on Monday thru Friday between 8am and 5pm. If attempts to reach the examiner are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9306. Any inquiry of a general nature or relating to the status of this application should be directed to the receptionist whose telephone number is 703-308-1148.
